

Madera County Mosquito & Vector Control District

NOTICE OF SWIMMING POOL VIOLATION

Immediate Action Required

Description	Respondby	NecessaryAction
Unmaintained Swimming Pool Immediate Action Required		Contact the District Office: (559)662-8880

The Madera County Mosquito and Vector Control District has recently conducted aerial surveillance for unmaintained swimming pools in the District.

Due to the condition of the swimming pool on this property, it has been flagged as a potential habitat for mosquitoes and a risk to public health.

Failure to prevent the breeding of mosquitoes or other vectors of disease may result in fines up to \$1,000 per day in accordance with California Health & Safety Codes sections 2000-2067.

If you received this notice in error, please contact the District to update the record.

Instructions

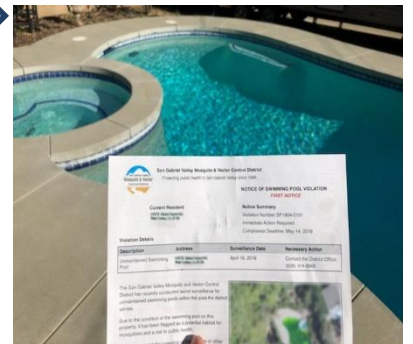

Contact the District immediately to schedule an inspection and/or discuss alternative options. There is no cost for the inspection.

- If needed repairs and/or maintenance of the swimming pool will take longer than the 7-day compliance deadline, DO NOT WAIT to call and schedule an inspection. The District will help control the mosquitoes while the work is being done.

Or, text a photo of your clean or empty pool with property address to mmvcd2018@gmail.com

(See sample photo) →

- If the violation is corrected and the swimming pool is **CLEAN and FUNCTIONAL* before the compliance deadline, you may send a text confirmation instead of scheduling a property inspection.
- The photo of the clean or empty pool must include the upper portion of this notice in the foreground.

** A CLEAN and FUNCTIONAL pool has a working pump and filtration system and has a regular chemical treatment schedule. Water must be clear with little to no algae or debris.*

*** Call: 559-662-8880 or Visit our Website www.maderamosq.org**

Swimming pools are some of the most common breeding sites for mosquitoes in suburban neighborhoods. **Left unmaintained, a single swimming pool can produce up to 3,000,000 mosquitoes in one month.** This staggering number is more than enough to threaten the public health of an entire neighborhood.

Thank you in advance for your cooperation.
